

The People's Business

This (enter as appropriate) recognises the important role that co-operatives can play in creating an economy where the power and wealth generated by commerce is shared throughout the population. It therefore resolves that measures should be taken to promote co-operative ownership by ensuring that:

1. Public policy promotes corporate diversity
2. Regulations ensure a better business environment that facilitates fair competition between all business forms so that co-operatives and Mutuals can compete on a level playing field
3. Governments pursue policy that encourage greater democratic participation of employees, consumers and communities in business
